About ELECTRO POWER SYSTEMS

Electro Power Systems (EPS) operates in the sustainable energy sector, specialising in storage solutions and microgrids that enable intermittent renewable sources to be transformed into a stable power source. Listed on the French-regulated market Euronext (EPS:FP), EPS is part of the CAC® Mid & Small and the CAC® All-Tradable indices. Its registered office is in Paris and conducts its research, development and manufacturing in Italy. Thanks to technology covered by 130 patents and applications, combined with more than 10 years of R&D, the Group develops utility scale energy storage systems to stabilize electrical grids that are heavily penetrated by renewable sources in developed countries and microgrids in emerging economies to power off-grid areas at a lower cost than fossil fuels. As of 31 December 2017, EPS has installed and has under commissioning an aggregate of 48 large scale projects, including off-grid hybrid systems powered by renewables and energy storage that provides energy to over 165,000 customers every day, with a total capacity output of 47MWh systems in 21 countries worldwide, including Europe, Latin America, Asia and Africa.
